SOFTWARE ENGINEER

Software Engineer experienced in JavaScript with React and Python programming. Fueled by a strong passion for continual learning and growth, I eagerly embrace new technologies and concepts to enrich my understanding. I excel in navigating challenges and pushing boundaries, leveraging a robust work ethic, acute attention to detail, and adept problem-solving abilities. I bring strong skills in project management and planning, decision making under pressure, and written and verbal communication that help companies to operate more efficiently and drive bottom-line performance.

Programming Languages: JavaScript, Python

Web Development: React, React Native, Flask, HTML, CSS, Tailwind, Bootstrap

Databases: SQL, MySQL

Tools & Technologies: Git/GitHub, Postman, JSON, Material UI, Syncfusion Figma, TypeScript, AWS Cloud

Other Skills: APIs, QA, Debugging, Microsoft Word, Microsoft Excel

TECHNICAL PROJECTS

RYME - [Github](#) | [Demo](#)

A personal project that contains information about me, which includes my family, my favorite foods, sports and life goals.

- Developed using React, HTML, and Bootstrap CSS for an interactive website.
- Constructed a fully functional CRUD system with a JSON server for data retrieval.
- Designed and optimized the website layout for seamless navigation.

QR Code Generator - [Github](#) | [Demo](#) | [Website](#)

This app allows you to easily generate and download QR codes from text or URLs.

- Developed a web application using CSS, JavaScript, and HTML
- Integrated with a QR Code Generator API.
- Customized for both PC and mobile devices.

Calculator - [Github](#) | [Demo](#) | [Website](#)

This is a fully functional and personally customized calculator.

- Created a fully functional calculator using React, HTML, and CSS.
- Integrated a Math API for instant results.
- Ensured responsive design for various devices.
