SOFTWARE ENGINEER

Full Stack Web Developer experienced in Python with Flask and JavaScript based programming. Fueled by an insatiable passion for continual learning and growth, I eagerly embrace new technologies and concepts to enrich my understanding. I excel in navigating challenges and pushing boundaries, leveraging a robust work ethic, acute attention to detail, and adept problem-solving abilities. I bring strong skills in project management and planning, decision making under pressure, and written and verbal communication that help companies to operate more efficiently and drive bottom-line performance.

TECHNICAL SKILLS

JavaScript, Flask, Python, ReactJS, SQL, MySQL, HTML, CSS, Tailwind, Bootstrap, Git, JSON, Material UI, Figma

TECHNICAL PROJECTS

RYME - [Github](#) | [Demo](#)

A personal project that contains information about me, which includes my family, my favorite foods, sports and life goals.

- Developed the front end using React for interactive and smooth movement throughout the website.
- Created and implemented a custom JSON server for this website that fetched data to display on the pages.
- Applied Bootstrap CSS to make the website cleaner.

Restaurant Website Template - [Github](#) | [Demo](#)

This is a template that any restaurant can use to showcase themselves.

- Created with Javascript, Html, and CSS giving the website a clean, aesthetic look.
- Contains smooth navigation to the Home, About, Menu, Awards and Contact page.
- Ability to add the user to register and reserve tables.

StyleMate - [Github](#)

StyleMate is a web application that empowers users to effortlessly craft diverse outfits from their uploaded clothing images, complemented by an integrated weather display for seamless outfit curation.

- Implemented unique customization for each user to create a login username and password.
- Created the front and back end of the project using Python, React, and JavaScript.
- Constructed the styling of this web app using Material UI, CSS.
- Utilized a weather API and created a custom display for the weather to display on the app.
