SOFTWARE ENGINEER

Front End Web Developer experienced JavaScript and React based programming. Fueled by an insatiable passion for continual learning and growth, I eagerly embrace new technologies and concepts to enrich my understanding. I excel in navigating challenges and pushing boundaries, leveraging a robust work ethic, acute attention to detail, and adept problem-solving abilities. I bring strong skills in project management and planning, decision making under pressure, and written and verbal communication that help companies to operate more efficiently and drive bottom-line performance.

TECHNICAL SKILLS

JavaScript, ReactJS, HTML, CSS, SQL, MySQL, Tailwind, Bootstrap, Flask, Python, Git, JSON, Material UI, Figma, APIs, AWS

TECHNICAL PROJECTS

QR Code Generator - [Github](#) | [Demo](#) | [Website](#)
This app allows you to easily generate and download QR codes from text or URLs.
- Developed using CSS, JavaScript, and HTML for a simple and clean application.
- Connected with an API that creates these QR Codes
- Customized for both pc and mobile devices

Calculator - [Github](#) | [Demo](#) | [Website](#)
This is a fully functional and personally customized calculator.
- Created with ReactJS, HTML, and CSS giving the website a clean, aesthetic look.
- Gives instant results with no delay time.
- Responsive design for seamless use on various devices, including desktops, tablets, and smartphones.

RYME - [Github](#) | [Demo](#)
A personal project that contains information about me, which includes my family, my favorite foods, sports and life goals.
- Developed the front end using React for interactive and smooth movement throughout the website.
- Created and implemented a custom JSON server for this website that fetched data to display on the pages.
- Applied Bootstrap CSS to make the website cleaner.
